

JDR PACIFIC VENTURES LTD.
dba Sunshine Coast Air & Tofino Air

ACCESSIBILITY PLAN & FEEDBACK PROCESS
2024-2027

PROGRESS REPORT 2026

AS OF JUNE 2026

General

JDR Pacific Ventures Ltd published our first Accessibility Plan and Feedback Process in 2024. The objective of this initiative is to provide safe transport in an inclusive environment to passengers of all ability levels. We remain committed to assessing and removing boundaries that may provide barriers to the accessibility of our services, communications, and environments.

This progress report covers the period from July 2025 – June 2026.

The accessibility plan, description of feedback process and progress report are available on our website as a downloadable pdf. Additional formats (hard copy, large font, and others) can be made available upon request. Printed, large font copies and electronic format that is compatible with adaptive technology will be provided within 20 days of the initial request. Braille and audio formats will be provided within 45 days of the request. Requests can be made through the contact information below

Information and Communication Technologies (ICT)

JDR Pacific Ventures Ltd is committed to maintaining user-friendly websites and email communication companywide. A new website for Sunshine Coast Air and Tofino Air has been completed. New sites were identified as a necessary update to ensure ease of use and the greatest level of clarity when accessing information related to our services.

An online survey which can be provided to passengers or their families following their experience with us. This survey can be submitted anonymously if preferred or can be provided in a paper format as requested. The feedback provided on the survey will be used to ensure JDR Pacific Ventures Ltd understands the needs, expectations and abilities of our passengers and how they interact with our services and built environment.

Communication, other than ICT

JDR Pacific Ventures Ltd is committed to providing exceptional service when assisting individuals with their travel needs. Our teams are trained in accessibility-based procedures to provide respectful, caring, and informed service to all passengers, including those with disabilities.

Procurement of Goods, Services and Facilities

JDR Pacific Ventures Ltd has sourced wheelchairs for all base locations. Where the option is unavailable at remote base locations, procedures have been put in place to transport a wheelchair to accommodate passengers as required and the location permits.

Design & Delivery of Programs & Services

Each interaction with passengers requiring assistance is used as a training tool for employees of JDR Pacific Venture Ltd. These exchanges create an open dialogue between management and employees to continuously develop procedures to remove boundaries that may provide barriers to the accessibility of our services, communications, and environments.

The Built Environment

All our main bases have aircraft access ramps to assist all passengers when boarding and disembarking our seaplanes. Our remote base location in Victoria and Tofino area has been outfitted with an aircraft access ramp to assist with boarding and disembarking at these locations.

Our Sunshine Coast and Vancouver Island base locations are equipped with wheelchairs to assist passengers to and from the aircraft as needed. Our teams help between offices and seaplanes, as well as allow for additional boarding time as needed by passengers.

Track lighting has been installed at our Sunshine Coast base dock to improve visibility and support safer, more accessible movement during periods of reduced daylight.

Transportation

Our offices have drop-off points for vehicles close to the door for check-in.

Provisions of CTA Accessibility Related Regulations

JDR Pacific Ventures Ltd is a federally regulated airline and adheres to the Accessible Transportation for Persons with Disability Regulations. (ATPDR) governed by the Canadian

Transportation Agency (CTA). The goal of these regulations is to eliminate barriers for individuals with disabilities.

Feedback Information

Our Management Team is responsible for the development and execution of the JDR Pacific Ventures Ltd Accessibility Plan, and the review of feedback provided by passengers, the community and employees of the company to ensure the ongoing improvement of an accessible environment.

Consultations

During 2024 and 2025 JDR Pacific Ventures Ltd has consulted with passengers with impairments that our services may be challenging for.

Consultations and follow-ups to initial consultations were conducted through a variety of platforms. An electronic and printed format survey was provided to passengers. Printed format surveys were provided to passengers at time of departure for their flight in office locations, and electronic surveys were emailed for remote completion. Follow-up conversations were via telephone and text messaging with passengers who provided initial feedback for the report. These surveys and conversations were provided to individuals who have experience with air travel, including float planes.

Through this feedback, the company has identified barriers to accessing the aircraft at both office and remote destinations. Enhanced accessibility options, such as ramps for boarding and disembarking, have been implemented where available. Feedback has also been provided with challenging aspects to access the facilities within our office locations. Paths of entry have been cleared, and walkways have been created for smooth transitions from drop off points to entry to the office, as well as from offices to docks for accessing aircraft.

Their feedback will continue to be used to shape the experience the company offers passengers from the booking process to onsite experiences, boarding and disembarking aircraft and the in-flight experience.

JDR Pacific Ventures Ltd will continue to consult with passengers, their families and third-party organizations to provide an accessible environment and inclusive, comfortable travel experience.

During 2025 and 2026, the company has engaged in discussions with key customers to improve accessibility at its destinations. During the current year, our objective is to continue conducting feedback discussions with clients to further enhance accessibility and overall customer experience. In addition, the accessibility survey has been updated to gather valuable customer-specific feedback and insights regarding the accessibility, efficiency, and overall smoothness of our operations and services.
